MPL Project - Plan2Shop

Problem Statement: Many individuals struggle with meal planning and grocery shopping due to inefficiencies in existing apps, which lack seamless integration and personalized grocery list and effective food waste management. This leads to difficulties in maintaining a consistent and healthy meal routine while minimizing effort and costs.

Description: Plan2Shop is a smart meal planning and grocery list app designed to simplify meal preparation and shopping. It helps users effortlessly plan weekly meals, generate personalised grocery lists, reduce food waste and maintain a healthy routine, with suggestions.

Features:

- 1) Dynamic Grocery list - Auto-generated based on selected meals categorised by sections
- 2) Custom Grocery list - Manually created by users
- 3) Meal Prep list - Organises ingredients and steps for cooking and meal prep.
- 4) Reminders - Notify about shopping and meal prep time.
